

**Press release:**

**AROA - Optimal lighting conditions thanks to a perforated metal diffuser**

*How often have you wished for a simple anti-glare lamp accessory for those moments when the lighting should be a bit more gentle? Derived from the well-known and beloved perforated metal diffusers from TRAPEZ and SPINA, a similar perforated metal diffuser has now been developed for AROA.*

Installation requires no tools: The perfectly designed perforated metal diffuser is simply clipped to the diffuser and can be removed just as easily as it is mounted. This is a very easy way to regulate the distribution of light and light intensity after the fact. The perforated metal diffuser effectively reduces the glare of the downward-directed light.

The new perforated metal diffuser is available from June 2018 in anodised matt aluminium, chrome look as well as in special edition gold brown and can be mounted to the entire AROA lighting range.

**About RIBAG**

A high level of innovation is the driving force behind the success this Swiss family business has enjoyed for over 20 years. RIBAG's philosophy is characterised by a pioneering spirit and a passion for the aesthetics of lighting. The fact that the RIBAG brand has asserted itself for so many years in both domestic and foreign markets can be attributed to the company's relentless research in outstanding lighting solutions for discerning architecture, a unique design and distinctive quality.
